5	Service Delivery targets	7-22

#### 1. Legislative Framework

Section 1 of the Municipal Finance Management Act (No.56 of 2003) defines the SDBIP as:

"a detailed plan approved by the mayor of a municipality in terms of section 53 (1)(c)(ii) for implementing the municipality's delivery of services and the execution of its annual budget and which must include (as part of the top layer) the following:

- a. projections for each month of-
- i. revenue to be collected, by source; and
- ii. operational and capital expenditure, by vote;
- b. Service delivery targets and performance indicators for each quarter".

In developing a good performance management tool for the municipality, the IDP is drafted, the budget is drafted and the service delivery and budget implementation plan (SDBIP) is developed in order to put into effect the budget. The SDBIP is a monitoring and implementation tool that is the vital link between the Mayor, Council and Administration as it facilitates the process for holding management accountable for its performance. The SDBIP quantifies the strategic objectives as highlighted in the budget to measurable outcomes. It is then, that as a monitoring tool, the Mayor and Council are able to monitor the performance of Senior Managers and the Community is able to monitor the municipality.

Adherence to this SDBIP will ensure that the objectives set out in the budget are achieved and hence the objectives and goals identified in the IDP will be realised, thus ensuring service delivery and that the municipality meets the needs of the community.

The Ga-Segonyana Local Municipality SDBIP is established in terms of the Municipal Systems Act 32 of 2000 and compliance is further mandated by the following pieces of legislation to budget and deliver services to the community of Ga-Segonyana Local Municipality;

Frequent and Nature of Report	Mandate	Recipient

#### 2. Timing and Methodology

"Section 69 (3) (a) of the MFMA requires the accounting officer (Municipal Manager) to submit draft SDBIP and annual performance agreements for the municipal manager and all senior managers, as required in terms of section 57 (1) (b) of the Municipal Systems Act. These should be submitted to the mayor not later than 14 days after the approval of the annual budget. The Mayor in accordance with section 53 (3) (a) & (b) of the MFMA must not later than 14 days after the approval of the SDBIP ensure that the revenue and expenditure projections for each month and service delivery targets and performance indicators for each quarter, as set out in the SDBIP are made public. In the light of this statement must also ensure that the performance agreements of the municipal manager, senior managers and any other categories of officials as may be prescribed, are also made public. Copies of such performance agreements must be submitted to the Council and MEC for local government in the province".

These are the legal requirements and deadline limits to assist a municipality to comply with the law-however, best practice suggests that this be done earlier by municipalities, starting with senior managers to draw up their second layer departmental SDBIPs in the early stages of the planning and budget preparation process in line with the strategic direction set in the IDP. The mayor and municipal manager should lead this process.

The municipality should ideally publish its draft SDBIP with its draft budget, or soon after as supporting documentation to assist its budget hearings process normally held at the end of March or in April.

It should be noted that it is up to the municipality to determine extra detail, and whether they wish to bring forward their deadlines for submission and approval. A municipality could also opt to have a high level SDBIP complete with ward break-downs for tabling and publication, but may also in addition make available lower layer departmental SDBIPs and other information as requested by Council.

With careful planning of the budget process it may be possible for the Mayor to approve the SDBIP in less than 7 days after the council approves the budget. Legally, to take account of possible revisions to the budget, the Act allows for this to occur not later than 28 days after budget approval.

The SDBIP is a key management, implementation and monitoring tool, which provides operational content to the end-of-year service delivery targets, set in the budget and IDP. It determines the performance agreements for the municipal manager and all top managers, whose performance can then be monitored through Section 71 and 72 reports, and evaluated through the annual report process.

#### 3. SDBIP Cycle

The SDBIP process comprises the following stages, which forms part of a cycle:

Planning: During this phase the SDBIP process Plan is developed, to be tabled with the IDP Process Plan. SDBIP related processes e.g. workshop schedules distribution of circulars and training workshops, are also reviewed during this phase.

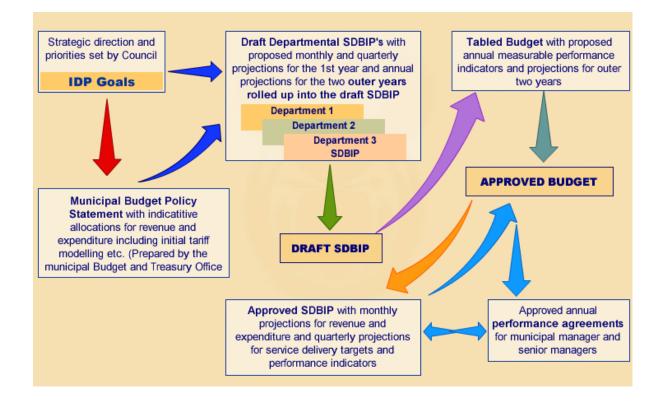

**Strategizing:** During this phase the IDP is reviewed and subsequent SDBIP programmes and projects for the next 5 years based on local, provincial and national issues, previous year's performance and current economic and demographic trends etc.

Tabling: Consultation with the community and stakeholders of the IDP on the SDBIP is done through budget hearings and formal local, provincial and national inputs or responses are also considered in developing the final document.

Adoption: The Mayor approves the SDBIP no later than 28 days after the adoption of the Municipality's budget.

**Publishing:** The adopted SDBIP is made public and is published on the Council's website.

The process for preparing and approving the SDBIP, as depicted in the MFMA Circular No.13, is diagrammatically summarised as follows:

### 4. The SDBIP as a Monitoring and Reporting Tool

This section covers reporting on the SDBIP as a way of linking the SDBIP with the oversight and monitoring operations of the Municipal Administration. Various reporting requirements are outlined in the MFMA and both the Mayor and the Accounting officer have clear roles to play in preparing and presenting these reports. The SDBIP provides an excellent basis for generating the reports for which the MFMA requires. These reports then allow the Council to monitor the implementation of Service Delivery Programs and Initiatives across the Municipality boundaries.

#### 4.1 Quarterly Reporting

Section 52 (d) of the MFMA compels the Mayor to submit a report to the council on the implementation of the budget and the financial state of affairs of the municipality within 30 days of the end of each quarter. The quarterly performance projections captured in the SDBIP form the basis for the mayor's quarterly report.

### 4.2 Mid-Year Reporting

Section 72 (1) (a) of the MFMA outlines the requirements for mid-year reporting.

The Accounting Officer is required by the 25th January of each year to assess the performance of the municipality during the first half of the year taking into account:

✓ The monthly statements referred to in section 71 of the first half of the year;

- ✓ The municipalities service delivery performance during the first half of the financial year, and the service delivery targets and performance indicators set in the Service Delivery and Budget Implementation Plan;
- ✓ The past year's annual report, and progress on resolving problems identified in the annual report; and,

The performance of every municipal entity under the sole or shared control of the municipality, taking into account reports in terms of section 88 from any such entities. Based on the outcomes of the mid-year budget and performance assessment report, an adjustments budget may be tabled if actual revenue or expenditure amounts are materially different from the projections contained in the budget or the SDBIP.

The SDBIP is also a living document and may be modified based on the mid-year performance review. The SDBIP remains a kind of contract that holds the Ga-Segonyana Local Municipality accountable to the community.
